## 4004

# BOARD DIPLOMA EXAMINATION, (C-14) OCT/NOV-2018 DTT-FIRST YEAR (COMMON) EXAMINATION

# ENGINEERING CHEMISTRY AND ENVIRONMENTAL STUDIES

Time: 3 hours | Total Marks: 80

### PART—A

 $3 \times 10 = 30$ 

**Instructions**: (1) Answer **all** questions.

- (2) Each question carries three marks.
- (3) Answers should be brief and straight to the point and shall not exceed *five* simple sentences.
- **1.** Define orbital. Draw the shapes of s and p orbitals.
- **2.** Calculate the oxidation number of nitrogen atom in the following:
  - (a)  $HNO_3$
  - (b) NH<sub>4</sub>Cl
  - (c)  $N_2O$
- **3.** Define molarity. How much amount of NaOH is required to prepare 500 ml of 0.1M NaOH solution?
- **4.** What is lionic product of water? Write its significance.

/4004 1 [ Contd...

- **5.** Define Conductor, insulator and electrolyte. Write one example for each.
- **6.** Write any three disadvantages of using hard water in industries.
- **7.** Define the term elastomer. Write any two examples for elastomers.
- **8.** Write the compositions of water gas and producer gas. Give their uses.
- 9. What is deforestation? State any two effects of deforestation.
- **10.** What are primary and secondary air pollutants? Write one example of each.

#### PART—B

 $10 \times 5 = 50$ 

**Instructions**: (1) Answer any **five** questions.

- (2) Each question carries ten marks.
- (3) The answers should be comprehensive and the criterion for valuation is the content but not the length of the answer.
- **11.** (a) State the Postulates of Bohr's Atomic theory? Write any two limitations
  - (b) Write the Electronic configurations of
    - (i) Sodium
    - (ii) Phosphorous
    - (iii) Chromium
    - (iv) Zinc
- **12.** (a) Define Normality. Calculate the normality when 9.8 grams of sulphuric acid is present in 2 lire solution.
  - (b) Define PH, Calculate the PH of 0.001M NaoH solution
- **13.** (a) What is smelting and Roasting. Explain with Example
  - (b) Explain the purification of Metal by Electrolytic refining.

/4004 2 [ Contd...

- **14.** (a) What is electrolysis? Explain the electrolysis of fused sodium chloride.
  - (b) Define EMF. Calculate the EMF of a following cell.

$$Ca_{(s)} / Ca^2 (1M) / / Pb^2 (1M) / Ph_{(s)}$$

The standard reduction potentials of Ca & Pb are -0.29V and -0.12V respectively.

- **15.** (a) What is Rusting of Iron? Explain its mechanism with equations.
  - (b) Explain impressed voltage method for the prevention of Corrosion of Metals.
- **16.** (a) Define soft water and hard water. Write one example for each.
  - (b) Explain the softening of hard water by ion-exchange process with a neat sketch.
- 17. (a) State any four characteristic properties of plastics.
  - (b) Write the method of preparation and any two uses of the following polymers.
    - (i) Polythene
    - (ii) Bakelite
    - (iii) PVC
- **18.** (a) Define and Explain the following terms:
  - (i) TLV
  - (ii) DO
  - (iii) COD
  - (iv) BOD
  - (b) Write the effects of Air Pollution of Human beings
