

II B. Pharmacy I Semester Regular/Supplementary Examinations, February/March - 2022 PHARMACEUTICAL ENGINEERING

ne: 3 h	ours Max. Marl Note: 1. Question paper consists of three parts (Part-I, Part-II & Part-III)	ks: 75
	2. Answer ALL (Multiple Choice) Questions from Part-I	
	3. Answer any TWO Questions from Part-II	
	4. Answer any SEVEN Questions from Part-III	
	<u>PART –I</u>	
i)	Ideally the drying should be done to a level of	(11
•••	(a) EMC (b) CMC (c) FMC (d) Zero moisture content	
ii)	Freeze drying works on the principle of	(1]
	(a) Evaporation of water	
	(b) Sublimation of water from ice phase to gas phase	
	(c) Liquefaction of ice to water	
:::)	(d) Heating at the freezing temperature of water The most efficient heat evolutions between the particles and flowing air ecours	(1)
iii)	The most efficient heat exchange between the particles and flowing air occurs in the	(1]
	(a) Tray dryer (b) Spray dryer	
	(c) Fluidized bed dryer (d) Rotary dryer	
iv)	Reynold's number (Re) for streamline flow of a fluid is	(1]
1 ()	(a) <0.2 (b) >0.2 (c) <0.8 (d) >0.8	(11
v)	Following is not the mechanism of size reduction	(1]
•)	(a) Impact and attrition (b) Cutting	(1)
	(c) Bruising (d) Elutriation	
vi)	For effective operation of ball mill the ball charge	(1]
,	(% volume of mill filled by the balls) should be	× ×
	(a) $60-70\%$ (b) $30-50\%$ (c) $<30\%$ (d) $>50\%$	
vii)	Critical speed of the ball mill is the speed at which	(1]
	(a) Balls begin to centrifuge with the mill	
	(b) Balls cascade over one another	
	(c) Balls are carried up the sides and fall freely onto material	
•••	(d) Balls start tumbling	(1)
viii)	Total 100 squares in a 1 inch2 area is termed	(1]
	(a) 100 mesh sieve (b) 10 mesh sieve (d) 25 mesh sieve	
iv)	(c) 20 mesh sieve (d) 25 mesh sieve	(11
ix)	Filter aids may be applied by (a) Precoating technique(b) Body-mix technique	(1)
	(c) Both (d) None	
x)	Integrity tests are intended for following filters:	(1]
л)	(a) Leaf filters (b) Drum filters	(1)
	(c) Membrane filters (d) Edge filters	
xi)	The equation describing the factors affecting the rate of filtration is	(11
)	(a) Darcy's equation (b) Dalton's equation	(11
	(c) Stokes' equation (d) None	
xii)	Hammer mill works by following principle:	(11
,	(a) Impact (b) Attrition (c) Compression (d) None	(

["]]"]"]"] www.manaresults.co.in

	xiii)	Following laws are used to predict energy requirements for comminuting	(1M)
	xiv)	process. (a) Rittinger's law (b) Kick's law (c)Bond's law (d) All Following is/are dimensionless number(s) (a) Reynold's number (b) Power number	(1M)
	xv)	 (c) Mass transfer number (d) All Which one is called as coarse powder? (a) All particles must pass through sieve no 10 	(1M)
		(b) All particles must pass through sieve no 22(c) All particles must pass through sieve no 44(d) All particles must pass through sieve no 85	(111)
	xvi)	Which of these is not mechanism of size separation?(a) Agitation(b) Brushing(c) Centrifugation(d) All of the above	(1M)
	xvii)	Cyclone separator works on the principle (a) Centrifugation (b) Agitation (c) Vibration (d) Gyration	(1M)
	xviii)	U-tube manometer is used to measure the pressure of a (a) Gas (b) Liquid (c) Gas as well as liquid (d) None	(1M)
	xix)	Inclined single column manometer is useful for which the pressure (a) Small (b) Medium (c) High (d) None	(1M)
	xx)	In Reynolds number the letter μ denotes(a) Kinetic viscosity(b) Absolute viscosity(c) Coefficient of friction(d) None	(1M)
		PART –II	
2.		<u>PART –II</u> hat is Reynold's number and explain its significance. escribe the factors affecting size reduction.	(5M) (5M)
2. 3.	b) Dea) State	hat is Reynold's number and explain its significance.	
	 b) Det a) Sta b) Wa a) Ex 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation.	(5M) (5M)
3.	 b) Det a) Sta b) Wa a) Ex 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender.	(5M) (5M) (5M) (5M)
3.	 b) Detail a) State b) W a) Ex b) W 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. plain Fouriers law in detail. rite the methodology of simple distillation.	(5M) (5M) (5M) (5M)
3. 4.	 b) Det a) Sta b) W a) Ex b) W 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. splain Fouriers law in detail. rite the methodology of simple distillation. <u>PART -III</u>	(5M) (5M) (5M) (5M) (5M)
3. 4. 5	 b) Detail a) State b) W a) Ex b) W 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. splain Fouriers law in detail. rite the methodology of simple distillation. <u>PART -III</u> splain about the rate of drying curve.	(5M) (5M) (5M) (5M) (5M)
3. 4. 5 6 7 8	 b) De a) Sta b) W a) Ex b) W Ex b) W Di W 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. splain Fouriers law in detail. rite the methodology of simple distillation. PART -III splain about the rate of drying curve. rite in brief the working and uses of sigma blade mixer. scuss the theories and factors affecting filtration. hat is centrifugation? Explain in detail the objectives and uses of centrifugation.	(5M) (5M) (5M) (5M) (5M) (5M) (5M) (5M)
 3. 4. 5 6 7 8 9 	 b) De a) Sta b) W a) Ex b) W Ex W Di W Ac 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. splain Fouriers law in detail. rite the methodology of simple distillation. PART -III splain about the rate of drying curve. rite in brief the working and uses of sigma blade mixer. scuss the theories and factors affecting filtration. hat is centrifugation? Explain in detail the objectives and uses of centrifugation. d a note on ferrous and non ferrous metals for construction.	(5M) (5M) (5M) (5M) (5M) (5M) (5M) (5M)
 3. 4. 5 6 7 8 9 10 	 b) Detail a) State b) W a) Ex b) W Ex Ex b) W Ex E	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. plain Fouriers law in detail. rite the methodology of simple distillation. PART -III plain about the rate of drying curve. rite in brief the working and uses of sigma blade mixer. scuss the theories and factors affecting filtration. hat is centrifugation? Explain in detail the objectives and uses of centrifugation. d a note on ferrous and non ferrous metals for construction.	(5M) (5M) (5M) (5M) (5M) (5M) (5M) (5M)
 3. 4. 5 6 7 8 9 10 11 	 b) Detail a) State b) W a) Ex b) W Ex W Di W Ac Ex W 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. eplain Fouriers law in detail. rite the methodology of simple distillation. PART -III plain about the rate of drying curve. rite in brief the working and uses of sigma blade mixer. scuss the theories and factors affecting filtration. hat is centrifugation? Explain in detail the objectives and uses of centrifugation. d a note on ferrous and non ferrous metals for construction.	(5M) (5M) (5M) (5M) (5M) (5M) (5M) (5M)
 3. 4. 5 6 7 8 9 10 	 b) Detail a) Stable b) W a) Ex b) W Ex W Di W Ac Ex W Ex Ex W Ex Ex W Ex Ex Ex W Ex 	hat is Reynold's number and explain its significance. escribe the factors affecting size reduction. ate about mechanisms of size separation. rite the construction and working of double cone blender. plain Fouriers law in detail. rite the methodology of simple distillation. PART -III plain about the rate of drying curve. rite in brief the working and uses of sigma blade mixer. scuss the theories and factors affecting filtration. hat is centrifugation? Explain in detail the objectives and uses of centrifugation. d a note on ferrous and non ferrous metals for construction.	(5M) (5M) (5M) (5M) (5M) (5M) (5M) (5M)
