8. Two companies X and Y producing 40 count cotton yarn with similar levels of investment, size, and labor force have been competing with each other. All their costs, such as raw materials, power, wages, administrative, sales, interest, and depreciation expenses, have been the same. Company X has been earning around 1.2 times of the net profit level when compared to the net profit earned by company Y.

The management of company Y appointed a taskforce to find out the reasons for the same. On detailed analysis carried over by the task force, it was found that the motivation level of employees of company X was relatively far higher than that of company Y. It was mainly on account of certain facilities provided to company X such as environment on the shop floor in terms of space for movement, lighting arrangements, canteen facilities, pickup and drop facility from home to company and back and a free membership of a local club. It was also found that emphasis of company X had free access to top management and every month employees achievements used to be recognized by giving them token prizes; handed over to them by the top management in person in a function organized by the company

Questions:

- i) Elaborate the benefits provided by company X as per the Herzberg's Two factor theory.
- ii) Discuss the impact of the provisions provided by company X on the performance of employees and more returns for company X.
