## 3015

## BOARD DIPLOMA EXAMINATION, (C-09) OCT/NOV-2015 DCE-FIRST YEAR EXAMINATION

## SURVEYING—I

PART—A
$3 \times 10=30$
Instructions : (1) Answer all questions.
(2) Each question carries three marks.
(3) Answers should be brief and straight to the point and shall not exceed five simple sentences.

1. State the classification of survey based on the object of survey.
2. What is the formula to calculate the area of a piece of land using Simpson's rule. Give a neat sketch.
3. State the functions of ranging rod, plumb bob, and cross staff.
4. Define (a) offset, (b) perpendicular offset, and (c) oblique offset.
5. Convert the following reduced bearing into whole circle bearing :
(a) $\mathrm{N} 60^{\circ} 30^{\prime} \mathrm{W}$
(b) $\mathrm{S} 80^{\circ} 0^{\prime} \mathrm{E}$
(c) $\mathrm{S} 20^{\circ} 45^{\prime} \mathrm{W}$
[ Contd...
6. Find the angle between the lines $A B$ and $B C$ if their respective bearings are (a) $A B=\mathrm{N} 76^{\circ} 38^{\prime} \mathrm{E}$ and $A C=\mathrm{S} 53^{\circ} 12^{\prime} \mathrm{E}$ (b) $A B=\mathrm{S} 36^{\circ} 12^{\prime} \mathrm{W}$ and $A C=\mathrm{N} 69^{\circ} 48^{\prime} \mathrm{W}$.
7. Compare the line of collimation with rise and fall method in levelling.
8. Briefly explain about reciprocal levelling with neat sketch.
9. Explain curvature correction and refraction correction in levelling.
10. List any three uses of Abney level.

> PART—B

Instructions : (1) Answer any five questions.
(2) Each question carries ten marks.
(3) Answers should be comprehensive and the criterion for valuation is the content but not the length of the answer.
11. What are the precautions to be taken while entering the measurements and details in chain field book?
12. A survey straight line $A B D E$ intersects a building between $B$ and $D$. To overcome the obstacle perpendicular $B C 90 \mathrm{~m}$ long is set out at $B$ from $C$. Two lines $C D$ and $C E$ are set out at angles $45^{\circ}$ and $60^{\circ}$ respectively with $C B$. Find the lengths $C D$ and $C E$ such that points $D$ and $E$ fall on the prolongation of line $A B$. Find the obstructed distance $B D$.
13. List any 10 parts of prismatic compass and state their functions.
14. (a) Define Fore Bearing and Back Bearing and state the relation between them.
(b) What is the difference between WCB system and QB/RB system?
(c) The true bearing of a line $A B$ is $125^{\circ} 30^{\prime}$ and the magnetic declination s $10^{\circ} 45^{\prime} \mathrm{W}$. Find the magnetic bearing of $A B$.
15. Following is a page of an old level field book in which certain entries are missing, find the missing entries :

| Station | BS | IS | FS | Rise | Fall | RL | Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2.345 |  |  |  |  | 129.25 | BM1 |
| 2 | 1.650 |  | $?$ | 0.035 |  |  |  |
| 3 |  | 2.210 |  |  | $?$ |  |  |
| 4 | $?$ |  | 1.850 | $?$ |  |  |  |
| 5 | 1.850 |  | 1.925 |  | 0.455 |  |  |
| 6 |  | $?$ |  | $?$ |  | 129.00 | BM2 |
| 7 | 1.690 |  | 1.140 |  |  |  |  |
| 8 |  |  | $?$ |  | $?$ | 128.500 | BM3 |

16. List the methods of contouring. Explain any one method.
17. Explain with the aid of a neat sketch the constructional details of a dumpy level.
18. Explain with neat sketch how the plans are enlarged or reduced by using Pantograph.
