R13

[5+5]

B.Tech II Year II Semester Examinations, May - 2017 **POWER SYSTEMS-I** (Electrical and Electronics Engineering) Max. Marks: 75 Time: 3 Hours Note: This question paper contains two parts A and B. Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions. (25 Marks) Why is the overall efficiency of a steam power station very low? Explain in 1.a) [2] detailed. What is the principle source of generation of electrical energy? [3] b) What is the importance of minimum potential on the distributor? [2] c) What is the controlling factor in determining the size of a distributor? [3] d) Why do we use isolators on both sides of circuit brakers? [2] e) What is the utility of instrument transformers in substations? [3] f) [2] Why is the power factor not more than unity? g) [3] What are the causes of low power factor? h) What is the importance of interest on capital investment in calculating the cost of i) electrical energy? What is the significance of depreciation in the economics of power generation? PART-B (50 Marks) What are the functions of economizer and superheated in a thermal power plant? 2.a) What are the types of nuclear reaction? Discuss briefly. b) What are the types of steam turbine? Briefly discuss about their use and 3.a) characteristics. What are the methods of producing nuclear reaction? What is chain reaction? b) [5+5]i) Write the difference between d.c. and a.c. distribution. 4.a) ii) Write short notes on the following Current distribution in a 3-wire d.c. system. A 3-phase, 4-wire system supplies power at 400V and lighting at 230 V. If the Lamps are used require 70, 85 and 44 amperes in each of the three lines, what should be the current in the neutral wire? If a 3-phase motor is now started, taking 220 A from the lines at a p.f. of 0.3 lagging, what should be the total current in each line and neutral wire? Find also the total power supplied to the lamps and the
