# **R13**

#### IV B.Tech I Semester Regular/Supplementary Examinations, Oct/Nov - 2018 RENEWABLE ENERGY SOURCES AND SYSTEMS (Electrical and Electronics Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

#### PART-A (22 Marks)

| 1. | a) | Explain about extra terrestrial radiation in brief.          | [3] |
|----|----|--|-----|
|    | b) | Distinguish between flat and concentrating collectors.       | [4] |
|    | c) | Draw the I-V characteristic of a solar cell.                 | [3] |
|    | d) | What are the advantages of wind energy conversion system?    | [4] |
|    | e) | What are limitations of micro hydro-electric power stations? | [4] |
|    | f) | What are the different types of fuel cells?                  | [4] |

#### **<u>PART-B</u>** (3x16 = 48 Marks)

| 2. | a)       | Explain briefly about the different parameters that describes the amount of solar energy reaching the earth surface?  | [8]        |
|----|----------|---|------------|
|    | b)       | Calculate the angle of incidence of beam radiation on a surface located at New Delhi, at 1:30 (Solar time) on 20 March, if the surface is tilted $45^{0}$ from the horizontal and pointed $30^{0}$ west of South. | [8]        |
| 3. | a)       | By defining various parameters, explain transmissivity based on reflection and refraction?  | [8]        |
|    | b)       | Describe various types of solar air heaters with neat schematic diagrams in brief.  | [8]        |
| 4. | a)       | What are the different considerations of PV modules to be connected in series and parallel for deciding PV system design?   | [8]        |
|    | b)       | Explain the necessity of using maximum power point tracking with the help of P-<br>V and I-V curves and describe on which factors efficiency of PV cell depends?  | [8]        |
| 5. | a)<br>b) | Explain how the wind energy systems (WECS) are classified? Discuss in brief?<br>Explain different schematics of wind power generation using induction generator   | [8]        |
|    | 0)       | as an option?   | [8]        |
| 6. | a)<br>b) | Describe different types hydro turbines that can work with larger water flow?<br>Explain various advantages and disadvantages of tidal energy generation system?  | [8]<br>[8] |
| 7. | a)       | What are the reactions phases that take place in a digester, explain them in detail?  | [8]        |
|    | b)       | Describe working principle of fuel cell with neat sketch and draw the   |            |
|    |          | performance characteristics of hydrogen-oxygen fuel cell?   | [8]        |

## IV B.Tech I Semester Regular/Supplementary Examinations, Oct/Nov - 2018 RENEWABLE ENERGY SOURCES AND SYSTEMS

Time: 3 hours

(Electrical and Electronics Engineering)

Max. Marks: 70

#### Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

### PART-A (22 Marks)

| 1. | <ul> <li>a)</li> <li>b)</li> <li>c)</li> <li>d)</li> <li>e)</li> <li>f)</li> </ul> | Explain terrestrial solar radiation assuming air mass zero?<br>What is the principle of working of solar pond?<br>Draw the typical power-voltage characteristics of a solar cell under varying<br>input conditions.<br>Define tip speed ratio in the wind energy conversion system?<br>What are the advantages of small hydro-electric power stations?<br>What are the various prospects of geothermal energy? | [3]<br>[4]<br>[4]<br>[3]<br>[4]<br>[4] |
|----|--|--|--|
| 2. | a)<br>b)   | <u><b>PART-B</b></u> ( $3x16 = 48$ Marks)<br>What is declination angle? Explain seasonal variation in the declination angle?<br>Calculate the number of daylight hours (sunshine hours) in Delhi on 20 <sup>th</sup> June<br>and azimuth angle New Delhi at 2.30 pm on 20 <sup>th</sup> February?  | [8]<br>[8]                             |
| 3. | a)<br>b)   | Express heat lost from collector in terms of overall loss coefficient? Explain<br>bottom loss coefficient in detail?<br>Explain the advantages of solar water heater with respective to conventional<br>water heaters.   | [10]<br>[6]                            |
| 4. | a)<br>b)   | Explain balance of system components in the PV system application?<br>How the maximum power is tracked from solar pv systems explain any<br>method?  | [8]<br>[8]                             |
| 5. | a)<br>b)   | Show that ideal maximum power coefficient is 0.59 for a horizontal axis windmill?<br>Explain different types and characteristics of windmill rotors with relevant diagrams?  | [8]<br>[8]                             |
| 6. | a)<br>b)   | Describe principle of flow rate Q measurement and explain any one method.<br>Describe how wave energy is extracted from the surface wave of deep water?  | [8]<br>[8]                             |
| 7. | a)<br>b)   | Explain in detail about anaerobic digestion and the different phases involved in this process?<br>Explain working principle of fuel cell and describe energy storage system using fuel cells?  | [8]<br>[8]                             |

### IV B.Tech I Semester Regular/Supplementary Examinations, Oct/Nov - 2018 RENEWABLE ENERGY SOURCES AND SYSTEMS

(Electrical and Electronics Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

### PART-A (22 Marks)

| 1. | a) | Explain extraterrestrial solar radiation assuming air mass zero?  | [3] |
|----|----|---|-----|
| 1. | b) | What is principle of working of solar air heater?   | [4] |
|    | c) | Draw the equivalent circuit of solar cell, how do you obtain its simplified circuit?                    | [4] |
|    | d) | What is meant by cut-in speed in wind energy conversion system?   | [3] |
|    | e) | What are the economic aspects of small hydro-electric power stations?                                   | [4] |
|    | f) | Explain the characteristics of hydrogen-oxygen fuel cell?   | [4] |
|    | -/ |   | Γ.1 |
|    |    | <b>PART–B</b> $(3x16 = 48 Marks)$   |     |
| 2. | a) | Describe in brief different empirical relations which predict the availability of                       |     |
| 2. | u) | solar radiation?  | [8] |
|    | b) | Calculate the hour angle at sunrise and sunset on plane surface tilted at an angle                      | [0] |
|    | 0) | of $20^{\circ}$ , given that $\varphi = 28^{\circ}N$ , $\delta = -21^{\circ}$ and $\gamma = 48^{\circ}$ | [4] |
|    | c) | Calculate the angle made by the beam radiation with normal to the flat plate                            | Γ.1 |
|    | 0) | collector on February 20, at 12.00 h (local apparent time), the collector is located                    |     |
|    |    | at New Delhi $(28^{\circ} 35^{\circ} \text{ N}, 77^{\circ}, 12^{\circ} \text{E}).$                      | [4] |
|    |    | u rev Denn (20 50 ri, 77, 12 E).  | Γ.1 |
| 3. | a) | Deduce the expression for heat gain rate in a collector and hence obtain collector                      |     |
| 0. | )  | heat removal factor?  | [8] |
|    | b) | Draw the schematic and give functional description of solar pond in detail?                             | [8] |
|    | -) |   | [.] |
| 4. | a) | Explain the effect of radiation intensity and temperature on short circuit current,                     |     |
|    | ,  | open circuit voltage and power generated in PV cell?  | [8] |
|    | b) | Draw the electrical layout of a typical solar PV system, state the functions of                         |     |
|    | ,  | essential equipment?  | [8] |
|    |    |   |     |
| 5. | a) | Explain principles of wind energy conversion and describe factors affecting wind                        |     |
|    |    | speed?  | [8] |
|    | b) | Describe salient features of horizontal axis and vertical axis wind turbines?                           | [8] |
|    |    |   |     |
| 6. | a) | Describe principle of working of reaction turbine? Briefly describe about                               |     |
|    |    | different types reaction turbines?  | [8] |
|    | b) | Explain about small Hydro electric scheme with a neat layout diagram.                                   | [8] |
|    |    |   |     |
| 7. | a) | Explain working principle of fuel cell and describe energy storage system using                         |     |
|    |    | fuel cells?   | [8] |
|    | b) | Describe principle of geo-thermal energy? What are the limitations of harnessing                        |     |
|    |    | geo-thermal energy?   | [8] |

Set No. 4

#### IV B.Tech I Semester Regular/Supplementary Examinations, Oct/Nov - 2018 RENEWABLE ENERGY SOURCES AND SYSTEMS (Electrical and Electronics Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

#### PART-A (22 Marks)

| 1. | <ul> <li>a)</li> <li>b)</li> <li>c)</li> <li>d)</li> <li>e)</li> <li>f)</li> </ul> | What is meant by local apparent time for calculating hour angle?<br>What are the various types and arrangements of solar air heaters?<br>Explain the factors that are considered for pv system design.<br>What is meant by cut-out speed is in wind energy conversion system?<br>What are the disadvantages of small hydro-electric power stations?<br>Why does water in geothermal acquifer remain in the liquid state? | [3]<br>[4]<br>[4]<br>[3]<br>[4]<br>[4] |
|----|--|--|--|
|    |  | $\underline{\mathbf{PART}}_{\mathbf{B}} (3x16 = 48 Marks)$   |  |
| 2. | a)   | What is declination angle? Find the value of this angle on March 21 <sup>st</sup> and December 31 <sup>st</sup> ?  | [8]                                    |
|    | b)   | Derive expression for the daily extraterrestrial radiation which falls on the  |  |
|    |  | surface having a slope $\beta$ and facing south?   | [8]                                    |
| 3. | a)   | Express heat lost from collector in terms of overall loss coefficient? Explain top loss coefficients in detail?  | [8]                                    |
|    | b)   | Draw the schematic and give functional description of cylindrical parabolic collector?   | [8]                                    |
|    |  |  |  |
| 4. | a)   | Derive an expression for efficiency and power produced by PV cell? Describe effect of cell temperature on cell efficiency?   | [8]                                    |
|    | b)   | Explain hill-climbing method of maximum power extraction in PV system in   |  |
|    |  | detail?  | [8]                                    |
| 5. | a)<br>b)   | List and explain the different types of turbines considered in wind energy system.<br>Explain different parameters which are required in the extraction of maximum   | [8]                                    |
|    | 0)   | power under varying wind speed conditions?   | [8]                                    |
| 6. | a)   | What is a tidal power plant and what factors are considered in order to install it?  | [8]                                    |
|    | b)   | Describe the wave power basic theory and obtain equation for its kinetic energy?   | [8]                                    |
| 7. | a)   | What are the different factors which affect the size of the bio gas plants?  | [8]                                    |
|    | b)   | Describe various advantages and disadvantages of geothermal energy forms?  | [8]                                    |
